Running Flutter Doctor

```
C:\WINDOWS\system32\cmd. X +
C:\Users\Administrator>flutter doctor
Building flutter tool...
Running pub upgrade...
Resolving dependencies... (5.9s)
Downloading packages... (3:01.3s)
Got dependencies.
Doctor summary (to see all details, run flutter doctor -v):
[✓] Flutter (Channel stable, 3.44.0, on Microsoft Windows [Version 10.0.26200.8457], locale en-US)
[✓] Windows Version (11 Pro 64-bit, 25H2, 20H9)
[✗] Android toolchain - develop for Android devices
    ✗ Unable to locate Android SDK.
       Install Android Studio from: https://developer.android.com/studio/index.html
       On first launch it will assist you in installing the Android SDK components.
       (or visit https://flutter.dev/to/windows-android-setup for detailed instructions).
       If the Android SDK has been installed to a custom location, please use
       'flutter config --android-sdk' to update to that location.
[✓] Chrome - develop for the web
[✓] Visual Studio - develop Windows apps
    ✗ Visual Studio not installed; this is necessary to develop Windows apps.
       Download at https://visualstudio.microsoft.com/downloads/.
       Please install the "Desktop development with C++" workload, including all of its
       dependencies.
[✓] Connected device (3 available)
[✓] Network resources

C:\Users\Administrator>
```

VS
code,
.dart

```
hello_world > lib > main.dart
1  import 'package:flutter/material.dart';
2
3  void main() {
4    runApp(const MyApp());
5  }
6
7  class MyApp extends StatelessWidget {
8    const MyApp({super.key});
9
10   // This widget is the root of your application.
11   @override
12   Widget build(BuildContext context) {
13     return MaterialApp(
14       title: 'Flutter Demo',
15       theme: ThemeData(
16         // This is the theme of your application.
17         // TRY THIS: Try running your application with "flutter run". You'll see
18         // the application has a purple toolbar. Then, without quitting the app,
19         // try changing the seedColor in the colorScheme below to Colors.green
20         // and then invoke "hot reload" (save your changes or press the "hot
21         // reload" button in a Flutter-supported IDE, or press "r" if you used
22         // the command line to start the app).
23         //
24         // Notice that the counter didn't reset back to zero; the application
25         // state is not lost during the reload. To reset the state, use hot
26         // restart instead.
27         //
28         // This works for code too, not just values: Most code changes can be
29         // tested with just a hot reload.
30         colorScheme: .fromSeed(seedColor: Colors.deepPurple),
31       ),
32     );
33   }
34 }
